# Online Directory Homepage

**T** TIS FashionBiz Online Directory is our new digital version of the TTIS Thailand Trade Buyer's Guide- Fashion, produced since year 2004. Previously the product came in a book format accompanied by a database-searchable CD-ROM. To make the product more user-friendly and versatile, we have turned the buyer's guide into an online version- starting January 2010.

The new online directory lists manufacturer, suppliers and service providers whose businesses are related to the textile industry in Thailand. Target users of this book/ CD set are people who make, buy, sell textile and related products, their suppliers as well as their service providers.

While the book/ CD were updated yearly, the new online version can now be updated all-year-round. With usernames and passwords we provide, listed companies can update their profiles online any time. New companies, however, need to fill out the questionnaires online, and after our verification, their profiles can then be uploaded. The online directory is produced in English only, with the companies also listed under Thai names. Added features include company's GIS location, video and photo display of products and services.

## Audience:

- Local & overseas textile manufacturers, traders and suppliers need to source products & services in Thailand
- Buyers and sellers, local and overseas, of products & services in the Thai textile industries.

## Who can be listed?

Any companies in Thailand, whose business is related to textile/ garment and related industry, as well as all other supporting industries

## Company listing

Company listing come in three categories:

- Complimentary listing. This is free of charge with limited company info shown on the profile page.
- Standard listing: This type of listing costs a small yearly fee. The profile shown to viewers is more detailed with company logos clearly shown in the profile page.
- Premium listing: This type, with a higher yearly fee, allows companies to both list their product & company information, as well as product display in photo or video format.

All listings will be equipped with GIS – Google Map application, where the location of listed companies can be specified on their Company Profile page.
